

Effluent Treatment Plant

Thinkgreen's Effluent Treatment Plants are designed after a proper Treatability and Feasibility study of the effluent. Thinkgreen has supplied more than 500 ETPs all over India and all its plants are completely custom made after a careful understanding of the nature and quantity of wastewater and its discharge norms in that region.

Advantages of ETP:

- Very compact and easy to operate
- Compliant with the Pollution control norms
- Resistant to chemicals
- Long lasting
- Extremely cost effective
- Delivery in the shortest possible time frame
- Upgradable if the nature or quantity of effluent changes in future
